About Cyprus Olives

The history of olive begins with that of the Mediterranean basin and is connected with the period of discoveries of conquests and trade.

In Cyprus the culture of olive is dated long ago and is classified in the traditional cultures. Its culture begins from the sea near regions and extends until the 900 metres altitude.

The Cypriots' love for the olive tree, is so great that they cultivate olive-trees almost in every yard or pavement!!!

The olive-tree is ever flourishing and the form and her size is proportional with the variety, the fertility of ground, the farming cares and the climatic conditions.
